DETAILED ACTION***Drawings***

1. The drawings were received on April 6, 2002 have been considered to be acceptable by the examiner.

Allowable Subject Matter

2. Claims 1-4 and 7-15 are allowed.
3. The following is an examiner's statement of reasons for allowance:

As per claims 1 and 12, it was not found to be taught in the prior art of determining a set of constraints specified by the client for conducting secure communication with a server via downloaded code. Secure code is verified locally by a client to determine whether the downloaded code will enforce the set of constraints specified by the client.

As per claims 3 and 14, it was not found to be taught in the prior art of using a first proxy code to obtain a second proxy code containing code for communication purposes, determining whether the second proxy code is trustworthy by using a trustworthiness routine, determining whether the server is trustworthy by using the second proxy code when it has been determined that the second proxy is trusted, requesting the server to determine whether the first proxy is trustworthy by using the second proxy when it has been determined that the server is trusted, and using the first proxy to invoke a method on the server when the first proxy has been determined to be trusted.

As per claim 7, it was not found to be taught in the prior art of a proxy that facilitates use of a service, a client program that invokes a method of the service using the proxy and specifies a set of constraints for conducting secure communication with the service and a secure verifier that determines whether the proxy will enforce the set of constraints when communicating with the service.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
